

Microsoft Word 2011 Introduction Macintosh

Duration: 1 Day of Training

Course Description

You'll learn how to use Word to create and edit simple documents; format documents; add tables and lists; add design elements and layout options; and proof documents.

Target Students

This course is designed for students who wish to learn the basic operations of the Microsoft Word to perform their day-to-day responsibilities, and who want to use the application to be more productive in their work. It provides the fundamental knowledge and techniques needed to use more complex Word features such as protecting your documents and using ligatures.

Prerequisites

Prospective students should be familiar with Mac OS X v10.5.8 (basic typing skills are recommended). They should be comfortable in the Macintosh environment and be able to use Macintosh to manage information on a computer. Specifically, they should be able to launch and close programs; navigate to information stored on the computer; and manage files and folders. Web browsing experience is also strongly recommended.

Delivery Method

Instructor led, group-paced, classroom-delivery learning model with structured hands-on activities.

Course Objectives

Upon successful completion of this course, students will be able to:-

- Identify and work with basic Word 2011 tools and features.
- Edit text in a Word document.
- Modify the appearance of text in a Word document.
- Insert special characters and graphical objects.
- Organize data in tables.
- Proof a Word document.
- Control the appearance of pages in a Word document.
- Print a Word document.
